- JSC Igristie Vina is the member of «Russian Champagne and Sparkling Wines Produces Association».

QUALITY GUARANTEES

Production of the JSC Igristie Vina winery is very special and guarantees quality that is reached by applying «step-by-step» system of production process monitoring together with fruitful work with wineries who supply wine materials.

What allow us to speak about it with confidence?

- We are working with wineries from Europe, South Africa New World and Russia. We take care about the perfect wine materials for our wines.
- Every year we select main suppliers of the wine material for each grape sort. For example, we have selected 4 wineries for the sort of Sauvignon, 4 wineries for the sort of Pinot Noir and 12 for the sort Chardonnay.
- Selection of the potential suppliers is done based on the basis of soil and climatic conditions of the region they are based (for example, very rainy summer or serious drought). Than we check preferred wineries on compliance with ecological standards and technical conditions of the winery equipment. We control conditions of the winery and the processes of grape maturing up to collection of crop.
- We have quality control on the each stage of our wine's delivery to the consumer – from the winery which provide materials to the shop shelves. All the raw materials are controls by the Independent Test Laboratories before it shipment to Saint-Petersburg and after arrival to our winery. Final check is done before transporting of wine to the trade companies, as ready product.
- Geographical varieties of the regions where the grape material was grown allow us to receive maximum choice of the sorts for the various production purposes. Understanding of each grape type helps us to receive ideal blending for sparkling wines and achieve the constancy of the taste for the varietal and blended still wines together with brandy.
